

Commissioning

USS SCORPION (SSN 589)

JULY 29, 1960 — 10:00 A. M.

**GENERAL DYNAMICS CORPORATION
ELECTRIC BOAT DIVISION
GROTON, CONNECTICUT**

USS SCORPION

The commissioning of the USS Scorpion today marks another increase in the power of the United States Navy, a valuable addition to the Fleet charged with protecting freedom around the world. She joins the fleet as a member of a class of the fastest and most maneuverable submarines afloat, a versatile, powerful striking force that serves as a warning to aggressors that force will be met with greater force.

Scorpion is the eighth nuclear submarine built by General Dynamics Corporation's Electric Boat Division for the U. S. Navy. Her keel was laid August 20, 1958 and she was launched December 19, 1959. Her sponsor is Mrs. Elizabeth S. Morrison, daughter of the commanding officer of the USS Scorpion lost in action during World War II.
